🪪 Profile

Software developer and passionate student, with a great interest in Frontend / UI-UX, though I also possess Fullstack experience (Node JS, Ruby on Rails, MongoDB). Cybersecurity is another one of my interests. Working with Kali Linux has become an important part of my developer life; I have experience making pen-testing and cybersecurity policies.

Enthusiastic team player with a passion to create solutions in a collaborative environment. I'm constantly searching for new projects and challenges that allow me to expand my knowledge and skills that provide me with important growth opportunities.

🗂 Projects

Mamoru, Web app 🔗   12/2021 – present
Mamoru is an app that connects students to exclusive offers from sustainable brands and shops. here I'm in charge of the design and UI/UX tasks; I have created new components for the application and I have designed through figma new features. the application is mostly created using react on the frontend side and php on the backend side.

Portfolio, https://emanuelcaro.me 🔗   12/2021
I have created my portfolio using vanilla JS, SASS and HTML5, so you can see my projects in detail.

Raibuon, Mobile app 🔗   11/2021
Raibu on is an application created to support Japanese street artists.

I managed the host and deploy the application, my role was lead developer, covering backend and frontend tasks.

My main challenge was the payment system of the application which is now functional.

Toys market place, mobile app 🔗   11/2021
It is an application designed to reuse toys that children stop using as they grow up.

I have worked on the reservation and loan system, the application was created using ruby on rails, postgresql and stimulus js.

Cocktails, Web app 🔗   10/2021
Is it a personal project designed to remember your favorite cocktail
recipes?

I have used ruby on rails and learned how to manage databases
through schemas using postgresql and handling with active records.

🧠 Skills

Ruby (1 year) | **JavaScript** (2 years) | **React.js** (1.5 years) | **Ruby on rails** (1 year)

node.js (1.5 year) | **SQL** (1 year) | **CSS, SASS, Bootstrap** (2 years) | **HTML 5** (2 years)

Jquery (1 year) | **Typescript** (5 months) | **graphql** (3 months) | **express js** (1 year)

mongodb (1 year)
